Applicant					
THE GOVERNMENT OF UNITED ST	TATES OF AMERICA				
1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.					
2. This REPORT consists o	f a total of $\underline{5}$ sheets, including	g this cover sh	eet.		
This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).					
These annexes consist of a total of sheets.					
3. This report contains indications relating to the following items:					
I Basis of the report					
II Priority					
III Non-establish	The state of the second to povelty, inventive step and industrial applicability				
IV \ Lack of unity

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

PC	T	π	SC	12	133	324	13

I.	Basis of the report	
	With regard to the elements of the international application:*	
	the international application as originally filed.	
	the description:	
	pages 1-15 as originally filed	
	pages NONE , filed with the demand	
	pages NONE, filed with the letter of	
	the claims:	
	pages 16-19 , as originally filed	
	pages 16-19 , as originally filed pages NONE , as amended (together with any statement) under Article 19	
i	pages NONE , filed with the demand pages NONE , filed with the letter of	
	the drawings:	i
l	pages NONE , as originally filed pages NONE , filed with the demand	l
ļ	pages NONE , filed with the letter of	l
		1
١	the sequence listing part of the description:	
	pages 1-2 , as originally filed pages NONE , filed with the demand	1
ļ		
	pages NONE, filed with the letter of the whit regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.  These elements were available or furnished to this Authority in the following language which is:	
	the language of a translation furnished for the purposes of international search (under Rule23.1(b)).	
١	the language of a danstation furnished for the perpendicular representation (under Rule 48.3(b)).  the language of publication of the international application (under Rule 48.3(b)).	
1	the language of publication of the international approximation (under Rules the language of the translation furnished for the purposes of international preliminary examination (under Rules

1	a restrict the analysis and/or amino acid sequence disclosed in the international application, the	١
-	3. With regard to any nucleotite and/or amino acts of the sequence listing: international preliminary examination was carried out on the basis of the sequence listing:	١
	contained in the international application in printed form.	١
١	filed together with the international application in computer readable form.	١
	furnished subsequently to this Authority in written form.	
1	furnished subsequently to this Authority in computer readable form.	١
ļ	The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the	١
	international application as filed has been furnished.	١
	The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.	1g
	4. The amendments have resulted in the cancellation of:	
	the description, pages NONE	
	the claims, Nos. NONE	
	the drawings, sheets/fig NONE	,
	5. This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**  beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**	
	beyond the disclosure as filed, as indicated in the supplemental box (text)  * Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).  ** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.	

International	application	No.

IV. Lack of unity of invention
1. In response to the invitation to restrict or pay additional fees the applicant has:
restricted the claims.
paid additional fees.
paid additional fees under protest.
neither restricted nor paid additional fees.
2. This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.
3. This Authority considers that the requirement of unity of invention is accordance with Rules 13.1, 13.2 and 13.3 is
complied with.
not complied with for the following reasons:
This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must inventive concept under PCT Rule 13.1.
Group I, claim(s) 1-14, drawn to a method of preparing autologous T-lymphocytes by obtaining PBMC from a patient immunized with an antigen of the cancer, stimulating the PBMC with said antigen in vitro, and tranducing said PBMC with a retroviral vector expressing human IL-2, and a composition comprising said autologous T lymphocytes.  Group II, claim(s) 15 and 16, drawn to a method of treating a patient having cancer with said autologous T lymphocytes. Group III, claim(s) 17-30, drawn to a method of preparing autologous Tumo-infiltrating-lymphocytes (TIL) by obtaining TIL from a gratent immunized with an antigen of the cancer, and tranducing said TIL with a retroviral vector expressing human IL-2, and a composition comprising said autologous TIL.  Group IV, claim(s) 31 and 32, drawn to a method of treating a patient having cancer with said autologous TIL.  The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The "special technical feature" Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The "special technical feature" Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The "special technical feature" (US Patent No. 5,874,556) teaches introduction of T I mynhocyte or TIL with a retroviral vector expressing II-2 protein. Lupton et al., 1999 (US Patent No. 5,874,556) teaches introduction of a retroviral vector expressing stimulatory factor, such as IL-2, into an activated (US Patent No. 5,874,556) teaches introduction of a retroviral vector expressing II-2 protein in lymphocyte on lymphocyte, such as CD8+ CTL, wherein expression of the IL-2 protein in lymphocyte can reduce dependency of the lymphocyte on lymphocyte, such as CD8+ CTL, wherein expression of the IL-2 protein in lymphocyte can reduce dependency of the lymphocyte on lymphocyte, s
4. Consequently, the following parts of the international application were the subject of international preliminary examination in establishing this report:
all parts.
the parts relating to claims Nos

### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### 1. STATEMENT

LIVILIA		
Namelin (NI)	Claims 1-32	YES
Novelty (N)	Claims NONE	NO
4,	Claims 1.32	YES
Inventive Step (IS)	Claims 1-32	NO
	Claims NONE	
Industrial Applicability (IA)	Claims 1-32	YES
	Claims NONE	NO
	<del></del> -	

#### 2. CITATIONS AND EXPLANATIONS

Claims 1-32 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest stimulating the PBMCs, obtained from a patient immunized with an antigen of a cancer, with the antigen of the cancer in vitro.

Claims 1-32 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.

Form PCT/IPEA/409 (Box V) (July 1998)

### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

PCT/US02/33243

#### VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the questions whether the claims are fully supported by the description, are made:

Claims 15, 16, 31 and 32 are objected to as lacking clarity under PCT Rule 66.2(a)(v) because of the claims are not fully supported by the description. The description does not disclose the claimed invention in a manner sufficiently clear and complete for the claimed invention to be carried out by a person skilled in the art because: the claims are directed to a method of treating a patient with cancer by administering to the patient autologous T lymphocytes or autologous TILs. The art of using immunized and genetically modified cells in treating cancer in vivo was unpredictable at the time of the invention. It is unclear whether the T lymphocytes or TILs can produce and secret sufficient IL-2 and antibody against cancer antigen so as to achieve therapeutic effects in vivo. Further, administration routes of the T lymphocytes or TILs also paly important roles in determining whether sufficient T lymphocytes or TILs can reach target cancer cells, and whether sufficient IL-2 and antibody against cancer antigen can be present at target cancer cells so as to achieve therapeutic effects in vivo.

Form PCT/IPEA/409 (Box VIII) (July 1998)
